CRS5 Update History

- **CRS5 Changes in Version 5.03 Dated 01/31/2007**

  1) **Entering New Recalls** – The problem of not being able to enter the recall date for a new recall has been fixed.

  2) **Diet/Checklist Refresh Adult Messages** – You no longer receive warning messages about missing entry/exit recalls when using the new buttons on the Nutrition and Behavior Checklist switchboards to refresh the Adult information.

- **CRS5 Changes in Version 5.02 Dated 01/19/2007**

  1) **System Configuration Programs** – System Configuration Edit has been modified to provide for selection of one of three programs: EFNEP, FSNE, or Other. When Other is selected, one can enter a name for the program – this should not be selected if the user is EFNEP or FSNE.

  2) **Zip/FTP** – New software for ZIP and FTP functions has been added. Backup on Normal Exit now flows better.

  3) **New Database** – Sample Adult ID Range no longer provided. Also, a bug that could prevent creating a new empty DataDB was corrected.

  4) **ERS4 to CRS5 Recall Conversion** – A bug associated with converting Food Group recalls was fixed.

  5) **Adult/Diet/Checklist Summary Report Screens** – The PP by ID filter now works correctly.

  6) **Adult Lessons and Contacts** – The Number of Lessons and Contacts fields have been moved above the Program Status field. If the program status is not Active, zeros will be flagged. This will help avoid forgetting to enter the lessons/contacts information.

  7) **Adult Summary Report** – The counts of the number of Adults in each subgroup was added to end of the report.

  8) **Food Lookup** – The Soundex option now operates correctly.

  9) **Food Item Details** – The meal item screen now has an exclamation point (!) button to view individual food item details.

  10) **Recall Calculation Correction** – The formula for allotting legumes to meats was corrected. After installing the update you will need to Recalculate Recalls from the Nutrition Switchboard to correct previous entries.

  11) **Diet/Checklist Summary Reports** – The correct reporting period is now displayed on the report. The Filter problem has also been corrected.

  12) **Diet/Checklist Refresh Adult –** Buttons have been added to the Nutrition and Behavior Checklist switchboards to refresh the Adult information. This should only be needed to correct conversion from ERS4 – an issue that some counties have experienced.

  13) **Recall List Report** – The on screen title has been corrected.

  14) **Deleted ERS4 Recall Problem** – When a new recall was created from an ERS4 recall but not saved, the ERS4 recall was deleted. This has been corrected.

  15) **Behavior Checklist Review Report** – N/A responses now print as a dash (-) on the base and additional questions reports.

  16) **Staff Status Report** – The Staff Status Report is now available.

  17) **Volunteer Summary Report** – The race/ethnic percentages are now correct.

  18) **Youth Reports** – The four disabled youth reports are now available.

  19) **Mail Labels Sort** – Sort by name now works correctly.

  20) **Export to State** – A digital signature has been added to the Export to State function for certification that data has been reviewed and deemed accurate.

CRS5 Update History

- **Changes in CRS 5.01 Dated 07/31/2006**
    1) **Adult Edit** – The residence and lesson type drop downs on the New Adult screen have the choice <unknown> replaced by blanks. For existing adults the blank/<unknown> choice is not available.
    2) **Import State Subgroups** – The import of state subgroups now works. Also, state and county subgroups now have the S: or C: prefix when displayed on screens.
